DILABS
RETURN ON INVESTMENT VS. RETURN ON EXPECTATIONS
IN AN ERASMUS+ PROJECT

Partners

Coordinator

What is DILABS ?

Training centers, VET, NGO, SME, Faculty of pedagogy, Sciences of Education, UCE (participants of the project)

Target

Exchange of practices, analysis of contexts

Expected results of the tools kit

Tools kit: videos, interactive activities, glossary, references

Professional Context

Analysis of Pedagogical Activities

Training of trainers Sciences of education

+ Expected targets: all stakeholders involved in adult education including managers (HR)

+ Better insight into the concept of key competences

Employability, inclusion, up(re)skilling

Analysis of Professional Activities

Moodle Platform

↑

Return On Expectations

Return On Expectations **approach** □ □ Follow-up of the project

- **Potential targets** beyond the consortium
- **Co-constructive approach** with stakeholders in order to meet their needs
- **Learning activities** implemented during the project will allow us to experiment and have a SWOT analysis of the productions and use indicators on the effectiveness of the training (evaluation system)

Model of calculation of costs linked to the application of the European program

The impact of Erasmus+ is evaluated through the quality of the project but also through the **efficient dissemination** to allow the **exploitation of the results** by a maximum of potential users that will **foster the Return On Investment**.
